- AutoPro2™ automatic program
 - Adaptive directional microphone
 - MyMusic™
 - Speech enhancement
 - AntiShock™
 - Wind noise manager
 - 3 manual programs
 - Optional Smart Control remote
 - Noise reduction
 - Feedback management system

Appreciate music

It's hard to enjoy the music when the sound is not clear.

MyMusic – a dedicated setting that increases the clarity of each note to enhance your overall listening experience and appreciation of your favorite music.

Hear every word

Soft spoken voices are often the hardest to hear.

Speech enhancement – identifies and amplifies soft speech to improve the clarity of sound and ease of listening without having to adjust the volume.

Make discreet adjustments

You want to modify your hearing instrument's settings with ease.

Smart Control – this optional remote control enables you to adjust your listening preferences at the touch of a button. It's very discreet and exceptionally convenient.

Experience automatic

You have distinct listening needs in different situations.

AutoPro2 – an automatic program with optimized settings for quiet and noisy environments. It automatically detects and changes settings according to your listening situation.

Easy listening in busy places

Background sounds distract you from group conversations.

Adaptive directional microphone – lets you focus on conversation and other sounds directly in front of you while reducing moving noise sources around you. Now you can enjoy quiet conversations in a noisy restaurant.

Setting the standard

Next 8 offers a great set of purpose-driven features including **noise reduction** and the most sophisticated **feedback management system**. Next comes in a wide range of styles and colors from ultra-small behind the ear (BTE) to discreet completely in the canal (CIC). Let your hearing health care professional help you select the style that's right for you.
